ENGR 111 Introduction to Engineering

Lecture #11

Academic Advising

Zoom protocol

Name Set your Zoom name to your real name, or whatever you'd like me to call you.

Photo Set a professional profile photo.

Camera Encouraged, not required.

Mic Off unless you're speaking.

Your questions, anytime Type in chat or raise your hand, and I'll check periodically. Or just unmute and jump in.

My questions to the class Answer in chat, or unmute and answer.

If you speak Please state your name first.

If I drop out (e.g., my Wi-Fi fails) Stay in the meeting. I'll be back in a few minutes on my phone hotspot.

Why CCC?

Lower tuition

Smaller classes

Focus on skills development

Approved transfer programs

Support / community / resources

Clackamas Community College

The Engineering Associate of Science

- Two-year AS at Clackamas, built to satisfy first two years of four-year BS program at university.
- 95 to 107 credits, depending on where you are headed and what you study.
- Partner universities: Portland State, OSU, Oregon Tech.
- Finish it and your credits transfer with junior standing.
- More info: www.clackamas.edu/academics/degrees-certificates/engineering-transfer

Common Course Numbering & Transferability

Take Calculus I (MATH 251Z) at Clackamas, and it is the same Calculus I at Portland State, OSU or Oregon Tech.

The 'Z' suffix in course number like MTH 251Z denotes a Common Course Number (CCN), which is part of Oregon's standardization for seamless transfer.

Note that other courses without 'Z' also transfer, for example MTH 254 has no 'Z' and still transfers fine to partner universities.

The Clackamas two-year program is built to transfer into a four-year engineering degree.

I recommend you meet with an academic advisor at the university you are heading to early, to formulate an academic plan and optimize your CCC course selection for maximum transferability into your BS program.

Accredited Universities

Oregon ABET accredited engineering programs:

Portland State University: Civil, Computer, Electrical, Environmental, Mechanical

Oregon State University: Architectural, Biological, Chemical, Civil, Construction Management, Ecological, Electrical and Computer, Energy Systems, Environmental, Forest, Industrial, Mechanical (Aerospace Minor option), Nuclear

Oregon Institute of Technology: Civil, Electrical, Mechanical, Renewable Energy

George Fox University: General engineering

University of Portland: Civil, Electrical, Mechanical

Transferring to a four-year university

You can transfer any term. Most students go in the fall, after finishing two years at Clackamas.

You can enroll at PSU any term. However, upper-division engineering courses are only open to students formally admitted to their program. You usually need to apply by April 15 for program admission (check program for current date and details) .

OSU's general education, Core Education, is the strictest. Not sure yet where you are going? Meet OSU's and you are covered anywhere. OSU has the same foreign language requirement as PSU.

Checking your degree progress

Go to my.clackamas.edu and open Self Service.

It lists every requirement for your degree, which ones you have finished, and which are still open.

If it takes you more than two years

- Common, and not a problem. Math placement is usually what sets the pace.
- Go part time and spread the sequence out.
- Run a professional technical program alongside it.
- Degree Partnership Program: enroll at Clackamas and a university at the same time.

Degree Partnership Program

Oregon State University

Oregon TECH

Portland State University

Degree Partnerships website

https://www.clackamas.edu/academics/degrees-certificates/transferring-to-a-university/degree-partnerships

Technical programs at Clackamas

Automotive Service Technology

CAD/CAM Technology

CNC Machining Technician

Construction Trades

Electronics Engineering Technology

Energy and Resource Management

Electrician Apprenticeship

Fire Science

Geographic Information Systems (GIS) Technology

Manufacturing Technology

Microelectronics Systems Technology

Network & Microcomputer Specialist

Renewable Energy Systems Technology

Water and Environmental Technology

Welding Technology

Why pursue technical program alongside AS in Engineering?

Income and hands-on experience while you work through the transfer degree.

A credential that employs you if engineering turns out not to be your thing or your engineering degree gets delayed due to life circumstances.

You can earn both. You meet the full requirements of each and apply separately.

Two paid six-month internships, junior year and senior year, usually at two different companies.

Adds about a year to the degree. You finish with a year of real experience and a salary from two companies. Gets "foot in the door" and excellent networking opportunity.

Some programs give academic credit or count it as a project course. It varies by university and by major, so ask your program advisor.

Some students take a course during an internship or over the summer to stay on pace.

Applying to MECOP

You apply in the winter of your sophomore year. The window runs roughly mid-February to the end of March.

You do not have to be at the university yet. MECOP's wording is "a current student at or planning to transfer to".

Four universities. OSU, Oregon Tech, Portland State, University of Portland.

Cumulative GPA above 2.50, then an academic screening and an in-person interview with company reps.
